SEC. 1113. - TAXI AND RAMP TAXI EQUIPMENT REQUIREMENTS.

(a) <u>Vehicle Operation.</u>

(1) Safe Operating Condition. All Taxis and Ramp Taxis must be maintained in a safe operating condition. Except as otherwise specified herein, all Taxi and Ramp Taxi Medallion Holders and Color Schemes are jointly and severally responsible for ensuring that all Taxis and Ramp Taxis for which they hold permits or with which they are affiliated meet all equipment requirements listed in this Section. In addition to imposing any applicable penalty for non-compliance with requirements, The SFMTA may remove any vehicle from service for any violation of this Section until the violation is corrected and the vehicle is inspected and approved by the SFMTA.

(2) Operation by Driver Permit Holders. No Permit Holder shall knowingly allow the use of a Taxi or Ramp Taxi vehicle as a motor vehicle for hire by any person who does not hold a Driver Permit and California drivers license.

(b) Equipment Placement. The placement <u>or display</u> of any equipment <u>or information</u> required by this Section 1113 shall not interfere with the Driver's visibility or the operation of any O.E.M. equipment.

(c) Exterior Display of Identifying Information. Every Taxi or Ramp Taxi shall have the following information displayed on the exterior of the vehicle:

(1) Vehicle Number.

(A) All Taxis and Ramp Taxis shall have the <u>The</u> Vehicle Number painted on or applied with adhesive on the vehicle in numerals of a color which contrasts with the color of the rest of the vehicle. Such number shall be at least four inches high and positioned directly under the windows on or within six inches of the forward most portion of both front doors and on the <u>center</u>, <u>lower left or lower</u> right corner of the rear facing portion of the trunk lid of the vehicle.

(B) The Vehicle Number shall be painted on the roof, hood or trunk of the vehicle in <u>numbers at least 18 inches in length of a color that contrasts with the color of the rest of the vehicle. The numbers shall be a minimum of 18 inches in length and must fill the entire width of the roof, hood or trunk. If the numbers are displayed on the roof, they shall be mounted and centered directly behind the top light.</u>

(2) San Francisco Taxicab. The words "San Francisco Taxicab" with letters at least two inches <u>high</u> in height, in a color which contrasts with the color of the rest of the vehicle shall be painted or attached by the use of adhesive letters on both sides of the vehicle's rear quarter panels and to the trunk directly above the rear bumper.

(3) Inspection Certificate. All Taxis and Ramp Taxis shall at all times conspicuously display a <u>A</u> current and valid SFIA decal indicating satisfactory completion of vehicle inspection as required by Section 1113(s).

(4) Trade Name. Every Taxi and Ramp Taxi shall have the <u>The</u> name of the Color Scheme with which the <u>vehicle's Medallion permit</u> is affiliated painted in letters at least two inches in height on the exterior of the side doors of each side of the vehicle.

DRAFT amendments to Transportation Code Section 1113

(5) **Trade Dress.** The exterior of every Taxi and Ramp Taxi shall be well painted with the color(s) of the Color Scheme with which it is affiliated.

(6) Medallion. During all hours of operation of a Motor Vehicle for Hire the Medallion shall be placed in the front windshield in such a manner that the Medallion number shall be clearly visible from the exterior of the vehicle.

(7) <u>Vehicle Wrap Advertising.</u> The design of any vehicle wrap advertising must be approved in advance by the SFMTA, and shall not include wrapping of windows. Any wrap design that covers identifying information listed in Section 1113(c)(1) shall reproduce such Vehicle Number in numerals at least eight inches high, and any wrap design that covers information required in Sections 1113 (c)(2) or (c)(4) shall reproduce such information in characters at least four inches high.

(8) Tobacco Advertising Ban.

(1) Color Schemes and Medallion Holders are prohibited from placing or maintaining, or causing or allowing to be placed or maintained, any advertising or promotion of cigarettes or tobacco products on any Taxi or Ramp Taxi.

(2) For the purposes of this subsection, "tobacco product" shall mean any substance containing tobacco leaf, including but not limited to, cigarettes, cigars, pipes, tobacco, snuff, chewing tobacco and dipping tobacco. For the purposes of this Section, "promote" or "promotion" shall include a display of any logo, brand name, character, graphics, colors, scenes, or designs that are trademarks of a particular brand of tobacco product.

(d) Interior Display of Information. Every Taxi or Ramp Taxi shall have the following items in the interior of the vehicle in a place clearly visible to passengers:

(1) Rate Card. Every Taxi and Ramp Taxi shall have permanently affixed to the interior of the vehicle, in a place easily visible to passengers, a clear display enclosing a card upon which shall be printed in plain, legible letters the schedule of rates that may be charged for carriage in such vehicle and such other provisions of this Article as the SFMTA may require. The display and its installed location in the vehicle must be approved by the SFMTA. A rate card supplied by the SFMTA.

(2) 311 Card. Every Taxi and Ramp Taxi shall have a clear display to hold a <u>A</u>311 card permanently affixed to the interior of the vehicle in a place readily visible to any passenger. The 311 card must clearly display that clearly displays the Vehicle Number and the name of the Color Scheme in plain, legible letters.

(3) Braille Display. All taxicab vehicles shall have a large sign in Braille mounted on the interior of the right rear door <u>immediately above the door handle</u> indicating the Vehicle Number and the name of the Color Scheme.

(4) Driver Identification. Every Taxi and Ramp Taxi shall be equipped with a \underline{A} holder for a Color Scheme Identification Card, placed in such a position that any passenger in the vehicle has a clear view of the front of the Driver's photo identification.

(e) Communication Equipment. Every Taxi and Ramp Taxi shall be equipped with direct voice access and two-way communication with a Dispatch Service affiliated with the Taxi or Ramp Taxi.

(f) Taximeters.

(1) Seal Required. The Taximeter installed in any Taxi and Ramp Taxi must have a current and valid seal from the Department of Public Health Weights and Measures. Any Taximeter removed from a Taxi or Ramp Taxi with or without its seals intact and placed in the same or another Taxi or Ramp Taxi must be certified and resealed by the Weights and Measures. Any Taxi or Ramp Taxi found to have Taximeter seals that are broken, removed, destroyed, marred or otherwise tampered with will be taken out of service until correctly repaired.

(2) Temporary Operation. Pending a Department of Public Health Weights and Measures inspection, a Taximeter that is new or a Taximeter that has a seal that has been broken, adjusted, repaired or serviced, may be placed in service for 24 hours when properly sealed, installed, replaced or repaired by a licensed technician approved by the Department of Public Health Weights and Measures. If the technician fails to comply with any state laws or regulations governing the Taximeter, then the vehicle shall be removed from service until corrected.

(3) Installation. All Taximeter makes and models must meet the approval of the SFMTA prior to their installation in any Motor Vehicle for Hire, and must meet all requirements of the Paratransit Program. The Taximeter shall be mounted no lower than either the lowest portion of the front window frame or the top of the dashboard in an area that is clearly visible at all times by any passenger in the vehicle. The Taximeter shall not be mounted in such a manner as to interfere with the intended function of O.E.M. equipment, including airbags.

(4) Illuminating Devices. Each Taximeter shall be equipped with an illuminating device that enables a passenger to conveniently observe the meter and the amount of fare registered at all times for that trip at all hours of the day and night.

(g) Safety Partition. Safety partitions of a design that is approved by the SFMTA may be installed in Taxi and/or Ramp Taxi vehicles at the option of the Color Scheme.

(h) Emergency Equipment. All Taxis and Ramp Taxis shall have at all times a functional spare tire, a working jack and wrench to replace a flat tire, and $\underline{\text{two}} 2$ flares or $2 \underline{\text{two}}$ freestanding reflectors.

(i) Signage and Displays. Only materials, signs and devices <u>that are safety related</u>, required by law or approved by the SFMTA may be placed on the windows, or displayed or hung inside or outside of a Taxi or Ramp Taxi.

(j) Lights.

(1) Standard Lights. All Taxi and Ramp Taxi vehicles shall be equipped with exterior lights as required by the Vehicle Code, an inside dome light; and dashboard lights. All O.E.M. lights must be maintained in working condition as designed, including headlights (high/low beam), parking lights, turn signals, tail and brake lights, inside dome light, dashboard lights, license plate light, emergency warning lights and side lights; and, all lenses of such lights are to be reasonably intact. No O.E.M. light may be obstructed or disconnected during operation. The "third" brake light shall be unobstructed and in good working condition at all times. Any additional modifications must have prior approval by the SFMTA.

DRAFT amendments to Transportation Code Section 1113

(2) Top Lights.

(A) All Taxis and Ramp Taxis must be equipped with a working top light containing a light or lights permanently attached to the roof of the vehicle, which may either have the name of the Color Scheme printed on it, or the words "Taxicab", or "taxi", "cab" or "meter rates".

(B) Each Driver shall ensure that such top light is illuminated at all times except when the vehicle is engaged in the transportation of a passenger. The top light shall turn on while the Taximeter is in the non-recording position and shall turn off while the Taximeter is in the recording position.

(k) Standard Equipment. All Taxis and Ramp Taxis Taxi vehicles shall have all equipment required by the Vehicle Code shall have the following standard equipment maintained in good working order such that the equipment functions effectively for the purpose for which it was intended. All Taxi and Ramp Taxi vehicles shall also be equipped with:

(1) Automatic door locks that can be controlled by the Driver and the passenger.

(2) Available and easily visible seat belts in all seating positions where passengers may ride.

(3) Rear view mirror and side view mirrors on both sides of the vehicle.

(4) (3) Speedometer and odometer.

(5) Horn.

(6) (4) Heater and air conditioner.

(7) (5) Door hinges, locks and latches.

(8) (6) Doors that operate easily and open and close securely from either the outside or inside of the vehicle.

(9) (7) Bumpers and body moldings in good condition and properly securely attached as the manufacturer intended.

(10) (8) Shock absorbers and springs.

(11) Windshield wipers with blades in good condition.

(12) (9) Suspension.

(13) (10) Steering.

(14) Brakes, including emergency brake.

(15) (11) A holder for the Medallion placed in such a position that the Medallion is clearly visible from the front exterior of the vehicle and that is either attached to the dashboard or to the left side of the right front support beam, on the interior of the vehicle.

(16) Exhaust system compliant with California law.

(17) (12) In-Taxi Equipment.

(13) Wheels with all lug nuts in pace and secured, of matching design (i.e. all whitewalls or all black walls), and with matching hubcaps attached, either of original manufacturer design or of a design authorized by the SFMTA, unless wheels are of a custom design that does not use hubcaps.

(14) Tires in safe operating condition and of matching design (i.e. all whitewalls or all black walls), without tire repair plugs or cuts in the sidewall, separated treads, bumps, bubbles, any thing protruding from the tire; and with a minimum remaining tread of at least 1/32 of an inch.

DRAFT amendments to Transportation Code Section 1113

(I) Tires and Wheels. All tires and wheels of Taxis and Ramp Taxis must comply with the following requirements:

(1) Meet all requirements of the California Vehicle Code.

(2) Be of matching design (i.e. all whitewalls or all black walls), and with matching hubcaps attached, either of original manufacturer design or of a design authorized by the SFMTA, unless wheels are of a custom design that does not use hubcaps.

(3) Only O.E.M. size tires of the same size used at the time of the Taximeter inspection may be used on any vehicle, including spare vehicles.

(4) If a Taxi or Ramp Taxi is disabled because of a flat tire and the spare tire is not the O.E.M. size for normal operation, the vehicle shall remain out of service until a tire of the correct size is installed.

(m) (I) Windows. All windows and the windshields of Taxis and Ramp Taxis shall be kept clean and clear, both the outside and inside. No additional tinting or reflective material may be placed on any vehicle window except factory installed tinting. Only safety glass with the lowest factory installed tint may be used. Nothing shall be placed in or on any portion of the vehicle in such a manner as to block the Driver's vision.

(n) (m) Security Cameras.

(1) All Taxis and Ramp Taxis shall be equipped with an approved operational security camera meeting the requirements of all applicable laws and meeting the following specifications: SFMTA specifications and signage notifying passengers of the presence of the camera that complies with SFMTA requirements.

(2) The SFMTA shall develop a list of approved camera model/systems and specifications on an annual basis.

- (1) No audio recording;
- (2) Dual video surveillance capability to record both the interior and exterior of vehicle;
- (3) GPS and accelerometer sensors;

(4) <u>A minimum of 16 GB of continuous-loop video data storage on a standard secure</u> digital card or hard drive; and

(5) A minimum of two data storage systems, one of which must be located outside of the passenger compartment of the vehicle and secured against theft or tampering.

(0) (n) Condition of Vehicle.

(1) Vehicle Integrity. The vehicle shall be structurally sound and operate with minimum vibration and noise.

(2) Vehicle Body. Vehicle bodies must be free of noticeable dents, rust and holes. A Taxi or Ramp Taxi shall not be placed in service if:

(A) There are visible dents which exceed three square feet in any single area of the exterior surface of the vehicle, provided that the deepest point of depression $\frac{34}{4}$ of an inch deep or greater, or

(B) There are visible dents which exceed four square feet of the total exterior surface of the vehicle, provided that the deepest point of depression is $\frac{3}{4}$ inch deep or greater,

DRAFT amendments to Transportation Code Section 1113

or

(C) There are visible dents which exceed six lineal feet of the total exterior surface of the vehicle, provided that the deepest point of depression is ³/₄ inch deep or greater, or (D) There is any area of the exterior surface of the vehicle that contains a hole larger than six square inches or there is a visible dent which exceeds 144 square inches, provided that the deepest point of depression is more than two inches.

(3) Sanitary Condition. Cleaning and Disinfection of Vehicle.

(A) Regular Cleaning of Vehicle. No Every Taxi or Ramp Taxi may be driven unless the must be regularly cleaned so that the interior is clean, orderly and kept free of offensive odors and stains. A Taxi or Ramp Taxi vehicle

(B) **Disinfection of Vehicle.** A Taxi or Ramp Taxi must be disinfected whenever required by SFMTA. in writing by the Department of Public Health.

(C)-(4) Seats. Seats shall be upholstered with vinyl or leather in good repair and matching upholstery and rugs shall match the vehicle's interior colors and must be kept in good repair. They must Seat covers may not be torn, stained separated or torn ripped. Seat springs may not be broken nor may they protrude through the upholstery. Seats shall be firm and comfortable and with the tension of the seat springs shall be evenly distributed. Seat covers may not be used to replace upholstery unless the colors match the vehicle's interior colors and they are sufficiently padded.

(5) Floormats. Rubber floormats are required.

(p) (o) Vehicle Title. The principal vehicle authorized for the operation of a Taxi or Ramp Taxi Medallion may be registered only in the name of the Medallion Holder, Color Scheme, and/or a Driver holding a valid lease for the vehicle that meets the requirements of this Article. If the vehicle is registered to the Driver, the registration must also include the name of the Medallion Holder or Color Scheme.

(q) (p) Vehicle Mileage. Starting mileage may not be more than 70,000 miles when a vehicle is placed into service. No vehicle may be operated as a Taxi or Ramp Taxi after the vehicle has reached $\frac{350,000}{325,000}$ miles.

(r) (q) Vehicle Age. No vehicle may serve as a Taxi or Ramp Taxi vehicle if it is older than eight model years. Beginning January 1, 2010, no vehicle which is older than seven model years may serve as a Taxi or Ramp Taxi; provided, however, that vehicles introduced into the fleet between January 1, 2007 and July 1 2008 shall be allowed to operate through December 31, 2010. Beginning January 1, 2011, no vehicle which is older than six model years may serve as a taxicab. Beginning January 1, 2012, no vehicle which is older than five model years may be used as a Taxi or Ramp Taxi vehicle. No vehicle older than six model years may be placed into service as a Taxi or Ramp Taxi vehicle, and no vehicle older than eight model years may remain in service as a Taxi or Ramp Taxi vehicle.

(s) (r) Inspections.

(1) Inspection Required. All Taxis and Ramp Taxis shall be inspected by the SFMTA or its designee every six months for spare vehicles <u>and vehicles with 200,000</u> <u>miles or more on the odometer</u> and every 12 months for regular vehicles at a date and time designated by the SFMTA, and at any other time deemed necessary. At the time of a scheduled inspection of the vehicle, the Color Scheme or Taxi or Ramp Taxi

DRAFT amendments to Transportation Code Section 1113

Medallion Holder must provide the following:

(A) Valid and current State of California vehicle registration card in the name of the Permit Holder.

(B) Valid and current Brake Certificate issued by an official inspection station certified by the State of California within 60 days prior to inspection.

(C) Proof of insurance meeting the requirements of all applicable laws and regulations.

(D) A Vehicle Introduction Form signed and approved by the SFMTA.

(2) New Vehicle. If a new vehicle is purchased for use as a Taxi or Ramp Taxi, the vehicle owner may furnish a written certificate of compliance issued by the automobile dealership in lieu of the documents required in subparagraphs 1113(s)(1)(A) through 1113(s)(1)(D) above, provided that the certificate is dated within 60 days of the annual inspection. The automobile dealership must be certified by the State of California as an official inspection station.

(3) Salvage Vehicle. No vehicle which has been designated as "Salvage" by the California Department of Motor Vehicles may be placed into service as a taxicab unless the vehicle has been inspected and approved by the SFMTA. The SFMTA may require documents to establish the chain of title for Salvage Vehicles.

(4) Inspection Certification. Upon satisfactory completion of all inspection requirements the SFMTA shall affix an SFIA <u>a</u> decal and transponder to the Taxi or Ramp Taxi which authorizes the Taxi or Ramp Taxi to be operated for the time period specified upon the decal. All Taxi and Ramp Taxis shall have a valid and current SFIA decal. The decal shall be conspicuously displayed on the Taxi or Ramp Taxi at all times.

(5) Failing Inspection. If, on inspection, the Commission or its designee the SFMTA determines that a vehicle does not meet the applicable requirements described in these Rules and Regulations or in the Municipal Police Code, the vehicle may fail inspection and may be ordered out of service until the condition(s) are corrected. A failed vehicle must be re-inspected and approved by the Commission or its designee before being returned to service and must pass another inspection in six months from the date of return to service. If a vehicle does not return to service within thirty (30) days it shall be permanently out of service, except by permission of the Commission or its designee and proof of repair. The decision to pass or fail a vehicle shall be at the sole discretion of the Commission or its designee SFMTA.

(6) Removal of Vehicle from Service.

(A) A Color Scheme shall make any vehicle available for inspection upon SFMTA request. If a Color Scheme fails to make a vehicle available for inspection or if the SFMTA determines that a vehicle is not in compliance with all applicable laws and regulations, the SFMTA may order the vehicle to be removed from service until it passes inspection.

(B) If the SFMTA determines that additional repairs or further inspection of the mechanical condition or safety equipment of a Taxi or Ramp Taxi by a licensed mechanic or technician is necessary, the Color Scheme or Medallion <u>Holder</u> shall make the necessary repairs or arrangements in order to determine if repairs are necessary, and must provide a statement of findings to the SFMTA from the repair person.

(7) Fraud in Connection with Inspection Prohibited. Misconduct in connection

DRAFT amendments to Transportation Code Section 1113

with required inspection is strictly prohibited and is grounds for revocation of a permit. Misconduct may include, but is not limited to, substitution of registered owners on a temporary basis for inspection purposes, <u>substitution of any vehicle part or equipment</u> within 30 days before or after an inspection for the purpose of passing inspection or knowingly making false statements to SFMTA or SFPD or their designees in connection with an inspection. This Section shall be strictly enforced to ensure the integrity of the San Francisco Taxi taxi fleet and the safety of the public.

(t) Condition of Vehicle.

(1) Vehicle Integrity. The vehicle shall be structurally sound and operate with minimum vibration and noise.

(2) Vehicle Appearance. Vehicle bodies must be free of noticeable dents, rust and holes. A Taxi or Ramp Taxi shall not be placed in service if:

(A) There are visible dents which exceed three square feet in any single area of the exterior surface of the vehicle, provided that the deepest point of depression $\frac{34}{4}$ of an inch deep or greater, or

(B) There are visible dents which exceed four square feet of the total exterior surface of the vehicle, provided that the deepest point of depression is $\frac{3}{4}$ inch deep or greater, or

(C) There are visible dents which exceed six lineal feet of the total exterior surface of the vehicle, provided that the deepest point of depression is $\frac{34}{4}$ inch deep or greater, or (D) There is any area of the exterior surface of the vehicle that contains a hole larger than six square inches or there is a visible dent which exceeds 144 square inches, provided that the deepest point of depression is more than two inches.

(u) (s) Replacement Vehicles. Whenever an existing Taxi or Ramp Taxi is replaced with another vehicle, the replacement vehicle must be inspected and approved prior to use.

(v) (t) Ramp Taxis. Every vehicle used as a Ramp Taxi shall have a ramp at least 30 inches wide. Any new model of Ramp Taxi vehicle proposed for use as a Ramp Taxi shall be subject to the prior approval of the SFMTA and the Paratransit Coordinating Council.

(w) (u) Retired Vehicles. No Permit Holder may offer any Taxi or Ramp Taxi vehicle for sale to the public until all remnants of the Color Scheme, including the top light and all exterior lettering, numbering, signage, and any other item required to be displayed on a Taxi or Ramp Taxi are <u>completely</u> removed.

(x) Tobacco Advertising Ban.

(1) Color Schemes and Medallion Holders are prohibited from placing or maintaining, or causing or allowing to be placed or maintained, any advertising or promotion of cigarettes or tobacco products on any Taxi or Ramp Taxi.

(2) For the purposes of this subsection, "tobacco product" shall mean any substance containing tobacco leaf, including but not limited to, cigarettes, cigars, pipes, tobacco, snuff, chewing tobacco and dipping tobacco. For the purposes of this Section, "promote" or "promotion" shall include a display of any logo, brand name, character, graphics, colors, scenes, or designs that are trademarks of a particular brand of tobacco product.

	(10)	Exhaust system compliant with California law.		
	(17)			
		In-Taxi Equipment.		
(I)				
	Tires and Wheels. All tires and wheels of Taxis and Ramp Taxis must comply with the following requirements:			
	(1)			
		Meet all requirements of the California Vehicle Code.		
	(2)			
		Be of matching design (i.e. all whitewalls or all black walls), and with matching hubcaps attached, either of original manufacturer design or of a		
	(2)	design authorized by the SFMTA, unless wheels are of a custom design that does not use hubcaps.		
	(3)	Only O.E.M. give time of the same give used at the time of the Tavimeter inspection may be used as envirable installed as an envirable installed as a second s		
	(4)	Only O.E.M. size tires of the same size used at the time of the Taximeter inspection may be used on any vehicle, including spare vehicles.		
	(7)	If a Taxi or Ramp Taxi is disabled because of a flat tire and the spare tire is not the O.E.M. size for normal operation, the vehicle shall remain		
		out of service until a tire of the correct size is installed.		

The SFMTA shall develop a list of approved camera model/systems and specifications on an annual basis.

Windows. All windows and the windshields of Taxis and Ramp Taxis shall be kept clean and clear, both the outside and inside. No additional tinting or reflective material may be placed on any vehicle window except factory installed tinting. Only safety glass with the lowest factory installed tint may be used. Nothing shall be placed in or on any portion of the vehicle in such a manner as to block the Driver's vision.

(n)

Cameras.

(1)

(2)

(1)

All Taxis and Ramp Taxis shall be equipped with an approved operational security camera meeting SFMTA specifications and signage notifying passengers of the presence of the camera that complies with SFMTA requirements.

(o)

Sanitary Condition.

- Regular Cleaning of Vehicle. No Taxi or Ramp Taxi may be driven unless the interior is clean, orderly and kept free of offensive odors. (2)
- Disinfection of Vehicle. A Taxi or Ramp Taxi must be disinfected whenever required in writing by the Department of Public Health.

(3)

Interior of Vehicle. Seats, upholstery and rugs shall match the vehicle's interior colors and must be kept in good repair. They must not be torn, separated or ripped. Seat springs may not be broken nor may they protrude through the upholstery. Seats shall be firm and comfortable and the tension of the seat springs shall be evenly distributed. Seat covers may not be used to replace upholstery unless the colors match the vehicle's interior colors and they are sufficiently padded.

(p)

Vehicle Title. The principal vehicle authorized for the operation of a Taxi or Ramp Taxi Medallion may be registered only in the name of the Medallion Holder, Color Scheme, and/or a Driver holding a valid lease for the vehicle that meets the requirements of this Article. If the vehicle is registered to the Driver, the registration must also include the name of the Medallion Holder or Color Scheme.

(q)

Vehicle Mileage. Starting mileage may not be more than 70,000 miles when a vehicle is placed into service. No vehicle may be operated as a Taxi or Ramp Taxi after the vehicle has reached 350,000 miles.

(r)

(s)

Vehicle Age. No vehicle may serve as a Taxi or Ramp Taxi vehicle if it is older than eight model years. Beginning January 1, 2010, no vehicle which is older than seven model years may serve as a Taxi or Ramp Taxi; provided, however, that vehicles introduced into the fleet between January 1, 2007 and July 1 2008 shall be allowed to operate through December 31, 2010. Beginning January 1, 2011, no vehicle which is older than six model years may serve as a taxicab. Beginning January 1, 2012, no vehicle which is older than five model years may be used as a Taxi or Ramp Taxi vehicle.

Inspections.

(1)

Inspection Required. All Taxis and Ramp Taxis shall be inspected by the SFMTA or its designee every six months for spare vehicles and every 12 months for regular vehicles at a date and time designated by the SFMTA, and at any other time deemed necessary. At the time of a scheduled inspection of the vehicle, the Color Scheme or Taxi or Ramp Taxi Medallion Holder must provide the following:

(A)

Valid and current State of California vehicle registration card in the name of the Permit Holder.

(B)

Valid and current Brake Certificate issued by an official inspection station certified by the State of California within 60 days prior to inspection.

(C)

Proof of insurance meeting the requirements of all applicable laws and regulations.

- (D)
- A Vehicle Introduction Form signed and approved by the SFMTA.
- (2)

New Vehicle. If a new vehicle is purchased for use as a Taxi or Ramp Taxi, the vehicle owner may furnish a written certificate of compliance issued by the automobile dealership in lieu of the documents required in subparagraphs 1113(s)(1)(A) through 1113(s)(1)(D) above, provided that the certificate is dated within 60 days of the annual inspection. The automobile dealership must be certified by the State of California as an official inspection station.

(3)

Salvage Vehicle. No vehicle which has been designated as "Salvage" by the California Department of Motor Vehicles may be placed into service as a taxicab unless the vehicle has been inspected and approved by the SFMTA. The SFMTA may require documents to establish the chain of title for Salvage Vehicles.

(4)

Inspection Certification. Upon satisfactory completion of all inspection requirements the SFMTA shall affix an SFIA decal and transponder to the Taxi or Ramp Taxi which authorizes the Taxi or Ramp Taxi to be operated for the time period specified upon the decal. All Taxi and Ramp Taxis shall have a valid and current SFIA decal. The decal shall be conspicuously displayed on the Taxi or Ramp Taxi at all times.

(5)

Failing Inspection. If, on inspection, the Commission or its designee determines that a vehicle does not meet the requirements described in these Rules and Regulations or in the Municipal Police Code, the vehicle may fail inspection and may be ordered out of service until the condition(s) are corrected. A failed vehicle must be re-inspected and approved by the Commission or its designee before being returned to service and must pass another inspection in six months from the date of return to service. If a vehicle does not return to service within thirty (30) days it shall be permanently out of service, except by permission of the Commission or its designee and proof of repair. The decision to pass or fail a vehicle shall be at the sole discretion of the Commission or its designee.

(6)

Removal of Vehicle from Service

(A)

A Color Scheme shall make any vehicle available for inspection upon SFMTA request. If a Color Scheme fails to make a vehicle available for inspection or if the SFMTA determines that a vehicle is not in compliance with all applicable laws and regulations, the SFMTA may order the vehicle to be removed from service until it passes inspection.

(B)

If the SFMTA determines that additional repairs or further inspection of the mechanical condition or safety equipment of a Taxi or Ramp Taxi by a licensed mechanic or technician is necessary, the Color Scheme shall make the necessary repairs or arrangements in order to determine if repairs are necessary, and must provide a statement of findings to the SFMTA from the repair person.

(7)

(1)

Fraud in Connection with Inspection Prohibited. Misconduct in connection with required inspection is strictly prohibited and is grounds for revocation of a permit. Misconduct may include, but is not limited to, substitution of registered owners on a temporary basis for inspection purposes, or knowingly making false statements to SFMTA or SFPD or their designees in connection with an inspection. This Section shall be strictly enforced to ensure the integrity of the San Francisco Taxi fleet and the safety of the public.

(t)

Condition of Vehicle.

Vehicle Integrity. The vehicle shall be structurally sound and operate with minimum vibration and noise.

(2)

Vehicle Appearance. Vehicle bodies must be free of noticeable dents, rust and holes. A Taxi or Ramp Taxi shall not be placed in service if: (A)

(~)

There are visible dents which exceed three square feet in any single area of the exterior surface of the vehicle, provided that the deepest point of depression % of an inch deep or greater, or

(B)

- There are visible dents which exceed four square feet of the total exterior surface of the vehicle, provided that the deepest point of depression is 34 inch deep or greater, or
- (C)
- There are visible dents which exceed six lineal feet of the total exterior surface of the vehicle, provided that the deepest point of depression is 34 inch deep or greater, or
- (D)

There is any area of the exterior surface of the vehicle that contains a hole larger than six square inches or there is a visible dent which exceeds 144 square inches, provided that the deepest point of depression is more than two inches.

(u)

Replacement Vehicles. Whenever an existing Taxi or Ramp Taxi is replaced with another vehicle, the replacement vehicle must be inspected and approved prior to use.

(v)

(w)

Ramp Taxis. Every vehicle used as a Ramp Taxi shall have a ramp at least 30 inches wide. Any new model of Ramp Taxi vehicle proposed for use as a Ramp Taxi shall be subject to the prior approval of the SFMTA and the Paratransit Coordinating Council.

Retired Vehicles. No Permit Holder may offer any Taxi or Ramp Taxi vehicle for sale to the public until all remnants of the Color Scheme, including the top light and all exterior lettering, numbering, signage, and any other item required to be displayed on a Taxi or Ramp Taxi are removed.

(x)

Tobacco Advertising Ban.

(1)

Color Schemes and Medallion Holders are prohibited from placing or maintaining, or causing or allowing to be placed or maintained, any advertising or promotion of cigarettes or tobacco products on any Taxi or Ramp Taxi.

(2)

For the purposes of this subsection, "tobacco product" shall mean any substance containing tobacco leaf, including but not limited to, cigarettes, cigars, pipes, tobacco, snuff, chewing tobacco and dipping tobacco. For the purposes of this Section, "promote" or "promotion" shall include a display of any logo, brand name, character, graphics, colors, scenes, or designs that are trademarks of a particular brand of tobacco product.
