## A Operational Efficiency

A1 Schedule Adherence
GOAL: >85\%

Purpose: To measure schedule Adherence.
Definition: Each line is checked at least once in each six month period. Such checks are conducted no less often than 10 weekdays and weekends per period. An annual checking schedule is established for the routes. The order in which the routes are checked is determined monthly through a random selection process. To the extent automated systems can be substituted at less cost for such checks, or the measurement of any performance standard, such systems will be used.
Method: Check the designated lines using criteria of $-1 /+4$ minutes. Periods of time includes morning rush ( $6 \mathrm{am}-9 \mathrm{am}$ ), midday ( $9 \mathrm{am}-4 \mathrm{pm}$ ), evening rush ( $4 \mathrm{pm}-7 \mathrm{pm}$ ), and night ( $7 \mathrm{pm}-1 \mathrm{am}$ ). Supervisors conduct a one-hour check at a point at mid-route during all four time periods stated above.

Purpose: To measure scheduled headways against actual headways.
Definition: Actual headways are compared with scheduled headways on all radial, express, cross-town, secondary, and feeder lines during all time periods. Each line is checked twice a year. Checks are conducted no less often than 10 weekdays and weekends per period. An annual checking schedule is established for the routes. The order in which the routes are checked is determined monthly through a random selection process. To the extent automated systems can be substituted at less cost for such checks, or the measurement of any performance standard, such systems will be used.
Method: Check the headways of designated lines. Periods of time include morning rush (6am-9am), midday (9am-4pm), evening rush ( $4 \mathrm{pm}-7 \mathrm{pm}$ ), and night ( $7 \mathrm{pm}-1 \mathrm{am}$ ). Supervisors conduct a one-hour standard check at a maximum load point at mid-route during all four time periods stated above.

Purpose: To measure service hours through available operators and equipment deployed in revenue service, along with the percentage of equipment available for service.
Definition: Monthly measurement of the percent of total available hours for service measuring operators and equipment and percentage of equipment available daily.
Method: Both operators and equipment are measured as to the total number of hours in service as a percentage of the total Scheduled hours. Data come from the online dispatching system. Measurement of the vehicles that begin service at the Scheduled time will be provided from the 8am and 6pm "Not-Out Report" generated by Central Control and will show the percent of vehicles that went out at the Scheduled time for both the AM and PM pullout.

Purpose: To measure crowding in vehicles.
Definition: \% of vehicles that pass published time points during measurement periods unable to pick up passengers due to crowding without being followed within 3 minutes or less by another vehicle on the same route with space for all waiting passengers. Pass-up measurements are conducted at least 10 weekdays per month. At the beginning of each quarter, supervisors review all lines checked in the previous quarter, and identify the five lines with the highest load factors, and the time period those load factors occurred. Supervisors check those five lines during the high load factor time period each month of the coming quarter. Supervisors also check to see if any Passenger Service Reports for pass-ups were made for the five lines, and if the location of the pass-up was recorded. If recorded, supervisors use that point as the point to check for pass-ups. If there are no locations recorded, supervisors use the stop before the maximum load point.
Method: Periods of time include morning rush (6am-9am), midday ( $9 \mathrm{am}-4 \mathrm{pm}$ ), evening rush ( $4 \mathrm{pm}-7 \mathrm{pm}$ ), and night ( 7 pm $1 \mathrm{am})$.

```
Load factors: # of lines exceeding target load factor during peak
GOAL: reduce # of lines over 85% load
periods

Purpose: To measure load factors at peak periods.
Definition: Each line is checked twice a year. Checks are conducted at least 10 weekdays and weekends per period. A checking Schedule is established for the routes. The order in which the routes are checked is determined monthly through a random selection process. To the extent automated systems can be substituted at less cost for checks, or the measurement of any standard, such systems are used. The maximum target load factor is \(85 \%\) of seating/standing capacity.
Method: Periods of time includes morning rush ( \(6 \mathrm{am}-9 \mathrm{am}\) ), midday ( \(9 \mathrm{am}-4 \mathrm{pm}\) ) afternoon rush (4pm-7pm), and night ( \(7 \mathrm{pm}-1 \mathrm{am}\) ). Supervisors conduct a one-hour, on time, and load standard check at a maximum load point at mid-route during all four time periods stated above.

A5 Vehicles available (AM/PM)
GOAL: >99.0\%

Purpose: To measure the percentage of equipment available for service.
Definition: Measurement of availability as a percentage of vehicles at each facility available at 7am/4pm on non-holiday weekdays against peak demand requirements.
Method: The Shop History and Online Parts System (SHOPS) provides the data. A vehicle is considered available for service if it is available for assignment to an operator no later than 7 am and 4 pm .

GOAL: <10.7\% for transit operators, \(5 \%\) year over year improvement for all others

Purpose: To measure unScheduled absences.
Definition: Monthly measurement of unScheduled absences is defined as time that is not Scheduled in advance and includes the following payroll categories: Sick pay (with pay), Sick Leave (without pay), AWOL, Worker's Comp, SDI, and Assault Pay.
Method: TESS and the Attendance Tracking System currently provide the data as a calculation of Scheduled hours available against unScheduled hours for Municipal Railway employees. For DPT employees, data is extracted from the DETS system.

*Includes conductors and gripmen.

Purpose: To measure reliability through the miles a vehicle travels between failures.
Definition: Monthly measurement is currently dictated by the Federal Transit Administration as follows: Failures are classified as either a major or minor failure of an element of the vehicle's mechanical system. For each incident of a major or minor failure, report whether the vehicle completes the trip or the vehicle does not complete the trip. If the failure occurs during deadhead or layover, include this in revenue vehicle system failures.
Method: Data is collected from the Central Control Log and the online SHOPS system. All verifiable major and minor mechanical defects are included as part of the mean distance between failure figure. Areas that do not result in a chargeable road call to the maintenance shops include accidents, sick passengers, vandalism, body damage and broken windows.

\section*{A8 Vacancy rate for service critical positions}

Purpose: To measure efficiency level of the department in hiring.
Definition: Monthly measurement of net vacancies against budgeted positions for Operations personnel.
Method: Monthly measurement of net vacancies against budgeted positions for Operations personnel. Calculated based on vacancies remaining once promotions and new hires have been deducted from retirees or resignations.
\begin{tabular}{|c|c|c|c|c|c|c|c|}

\end{tabular}

Purpose: To measure responsiveness to the public.
Definition: Each request is logged into an electronic database system and given a tracking number. Requests are then assigned to staff for investigation, which can include evaluation of existing conditions, collision history, traffic and pedestrian volume, circulation, and transit impact. Residents are notified of investigation results and recommendations. The request is then logged as completed.
Method: Using the existing database system, a report is generated to provide a response rate for all requests completed within a specific quarter.
\begin{tabular}{|c|c|c|c|c|c|}

\end{tabular}

\section*{Color curb applications: \% reviewed and processed to within \(\mathbf{3 0}\) days}

Purpose: To measure responsiveness to the public.
Definition: Residents, organizations, and business owners may apply for various color curb parking designations as authorized by the California Vehicle Code. These zones include loading zones (white), green zones (ten-minute parking), and red zones (driveway tip prohibited parking). This program administered by DPT is fully cost recovery. Upon receipt of application and fee, each request is logged into an electronic database system and given a tracking number. Requests are assigned to staff for investigation which includes an on-site survey to determine feasibility, necessity, and parking impact. Once the investigation is completed, the resident is notified in writing. If approved, an invoice is sent for painting fees. The request is then logged as completed.
Method: Using the existing database system, a report is generated to provide a response rate for all requests completed within a specific quarter.

\section*{RESPONSE RATE}
\begin{tabular}{|l|c|c|c|c|c|}
\hline & FY04 & FY05 & FY06 & FY07 & FY08 \\
\hline Goal & \(\mathbf{9 0 \%}\) & \(\mathbf{9 0 \%}\) & \(\mathbf{9 0 \%}\) & \(\mathbf{9 0 \%}\) & \(\mathbf{9 0 \%}\) \\
\hline Q1 (Jul-Sep) & \(25 \%\) & \(87 \%\) & \(84 \%\) & \(51 \%\) & \(47 \%\) \\

\hline
\end{tabular}

Purpose: To ensure consistent operation of parking meters and promptly repair inoperable meters.
Definition: Electronic parking meters are capable of self-reporting malfunctions. In addition, a hotline number is posted on each meter to enable members of the public to report instances of malfunction directly to the meter shop. These reporting mechanisms enable DPT to respond and repair meters in a timely and efficient manner to ensure the highest level of service to the public.
Method: The San Francisco Parking Meter Management System (SFPM) is a work order system which automates requests for service and allows them to be tracked and compiled. A report is generated providing the average response rate for all complaints received within a quarter.

\section*{RESPONSE RATE}
\begin{tabular}{|l|c|c|c|c|c|}

\hline
\end{tabular}

Purpose: To ensure the safety of all modes of transportation by responding quickly to complaints of hazardous traffic sign conditions.

Definition: The Sign Shop receives reports of hazardous sign conditions from city agencies and members of the public. Hazardous conditions include missing safety related signs or those that create physical public danger due to damage or disrepair. Staff maintains a manual log to record receipt of complaints and dispatches repair crews immediately.
Method: Sign Shop staff manually logs in each complaint and the date and time that the work is completed. DPT plans on upgrading this manual record keeping process to an electronic database system in the future.

\section*{RESPONSE RATE}

\end{tabular}

\section*{Hazardous traffic signal reports: \% responded to and repaired within} two hours

Purpose: To ensure the safety of all modes of transportation by responding quickly to complaints of hazardous traffic signal conditions.
Definition: During business hours, the Signal Shop enters malfunctions in a manual log and dispatches crews. During other hours, calls are routed to the 24 -hour hotline which logs the call and dispatches staff from the Department of Telecommunications and Information Systems (DTIS). If the problem is major and urgent, DTIS pages a Signal Shop emergency crew to the scene. Repair crews record their arrival time and the time the call is completed.
Method: All complaints and service requests are maintained in a database system. Reports are generated to determine average response rate.

Traffic lane lines, bus zones, and crosswalks: \% of network maintained per year

GOAL: >10\%/year

Purpose: To ensure the safety of all modes of transportation by maintaining visibility of existing lane line, bus zone, and crosswalk designations.
Definition: The Paint Shop's productivity is measured in relationship to annual goal. This measurement has been adjusted from a percentage of goal to a percentage of total inventory maintained.
Method: Work crews report actual daily production numbers to staff at the end of each day. This information is entered into a spreadsheet and tabulated to generate a report.
\begin{tabular}{|l|c|c|c|c|c|}

\end{tabular}

B Financial Stability (annually reported standards)

\section*{B1 Passengers carried*}

GOAL: \(1.5 \%\) increase to \(209,556,000\)

Purpose: To measure ridership.
Definition: Annual measurement of the number of passengers who board the Municipal Railway's revenue vehicles. A passenger is counted each time they board a vehicle, even though they may be on the same journey from origin to destination.
Method: Ride checkers are utilized to count passenger boardings.

RIDERSHIP BY MODE IN THOUSANDS OF PASSENGERS

\hline
\end{tabular}
*FY07 ridership statistics may be understated, as sampling was weighted toward the period of system instability following the T-Third service launch. Recent ridership counts indicate an increase in ridership during the current fiscal year, in part due to service changes put into effect on June 30, 2007.

Purpose: To measure fare revenue by average fare by passenger, mode, and general Fast Pass sales.
Definition: Fare revenue collection on board revenue vehicles; Monthly/Weekly Fast Pass sales; individual ticket sales at POP stations; 1, 3 and 7 day pass sales; Cable Car Souvenir Tickets, Bart Plus, Tokens' Adult/Youth/Senior Passes; Ballpark and Special Event Passes; Regional Passes, etc. The goal is not applicable in years when a fare increase occurs.
Method: Cash fares are collected electronically on board all revenue vehicles (with the exception of Cable Car), utilizing the Cubic Farebox system. In Cable Cars, a manual fare collection system along with sale of special passes is utilized. POP stations sell tickets on the platform.

C2 Operator conduct complaints and resolution
GOAL: >75\% resolved within 30 days

Purpose: To measure customer satisfaction with the Municipal Railway and the effectiveness of internal processes to address the complaints.
Definition: SFMTA summarizes complaints received, resolved, and outstanding on a quarterly basis.
Method: Data provided from the Passenger Service Report Unit and will be reported to the Board on a quarterly basis.

*ADA related passenger service reports are used to calculate this resolution rate. All others are forwarded to Divisions for resolution.

Purpose: To reduce accidents through effective operator training programs as well as effective accident follow-up training.
Definition: Monthly measurement of the number of training hours by type of class. Training hours are tracked for the following areas: New Operator Training, Immediate Follow-up Rides, One/Two Day Accident Retraining, Verification of Transit Training, Operator Refresher, and Passenger Relations/Conflict Training.
Method: Number of reportable accidents and training hours. Data are reported to the Board on a quarterly basis.

\hline
\end{tabular}

C4 Safety: Passenger and vehicle accidents
GOAL: 5\% annual reduction to 2,172

Purpose: To reduce accidents through effective operator training programs as well as effective accident follow-up training.
Definition: Track reduction in accidents as a result of more effective operator training and accident retraining.
Method: Number of reportable revenue service accidents. Data will be reported to the Board on a quarterly basis.

Jan-Mar 08
\end{tabular} \\
\hline Threats & \multirow{4}{*}{New service standards reporting categories in FY08.} & 15 & 22 & 15 \\
\hline Disturbances & & 17 & 21 & 18 \\
\hline Graffiti/Vandalism & & 64 & 58 & 68 \\
\hline Miscellaneous & & 37 & 64 & 54 \\
\hline TOTALS & NA & 133 & 165 & 155 \\
\hline
\end{tabular}
*The security incident reporting methodology has been updated to include additional categories under "Other Security Incidents". This section encompasses all security incidents not resulting an SFPD report. Previously, these incidents were not included in the Service Standards Reports.

\section*{Abandoned automobile reports: \% responded to within 48} hours

Purpose: To abate quality of life nuisances and hazards associated with abandoned automobiles.
Definition: Measures response time from receipt of complaint by Security and Enforcement's Abandoned Auto Detail to vehicle being marked for removal.
Method: The Detail maintains a manual log of complaints received and resolution. Staff compiles the information and generates a report.

\section*{RESPONSE RATE}
\begin{tabular}{|l|c|c|c|c|c|}
\hline & FY04 & FY05 & FY06 & FY07 & FY08 \\
\hline Goal & \(\mathbf{8 7 \%}\) & \(\mathbf{9 5 \%}\) & \(\mathbf{1 0 0 \%}\) & \(\mathbf{1 0 0 \%}\) & \(\mathbf{1 0 0 \%}\) \\
\hline Q1 (Jul-Sep) & \(86 \%\) & \(89 \%\) & \(92 \%\) & \(99 \%\) & \(98 \%\) \\
\hline Q2 (Oct-Dec) & \(95 \%\) & \(100 \%\) & \(98 \%\) & \(98 \%\) & \(98 \%\) \\
\hline Q3 (Jan-Mar) & \(92 \%\) & \(92 \%\) & \(95 \%\) & \(99 \%\) & \(98 \%\) \\
\hline Q4 (Apr-Jun) & \(76 \%\) & \(93 \%\) & \(95 \%\) & \(99 \%\) & \\
\hline Annual average & \(\mathbf{8 7 \%}\) & \(\mathbf{9 4 \%}\) & \(\mathbf{9 5 \%}\) & \(\mathbf{9 9 \%}\) & \\
\hline
\end{tabular}

\section*{C7 \\ Walk-in citation and residential parking permit customers: \% served within 20} minutes

Purpose: To provide a high level of customer service at our customer service center.
Definition: Percent of customers receiving service from the window clerk within 20 minutes of arrival.
Method: Staff utilizes a card system to track and record customer waiting times.

\section*{AVERAGE WAIT TIME}
\begin{tabular}{|l|c|c|c|}
\hline & FY06 & FY07 & FY08 \\
\hline \(\mathbf{Q 1}\) (Jul-Sep) & 46 min & 7 min & 6 min \\
\hline \(\mathbf{Q 2}\) (Oct-Dec) & 11 min & 7 min & 6 min \\
\hline \(\mathbf{Q 3}\) (Jan-Mar) & 12 min & 8 min & 8 min \\
\hline Q4 (Apr-Jun) & 9 min & 6 min & \\
\hline \begin{tabular}{l}

average
\end{tabular} & \(\mathbf{2 0} \mathbf{~ m i n}\) & \(\mathbf{7 ~ m i n}\) & \\
\hline
\end{tabular}
\% OF CUSTOMERS SERVED WITHIN 20 MINUTES
\begin{tabular}{|l|c|c|c|}
\hline & FY06 & FY07 & FY08 \\
\hline Goal & \(\mathbf{8 0 \%}\) & \(\mathbf{8 0 \%}\) & \(\mathbf{8 0 \%}\) \\
\hline \(\mathbf{Q 1}\) (Jul-Sep) & \(41 \%\) & \(94 \%\) & \(97 \%\) \\
\hline O2 (Oct-Dec) & \(94 \%\) & \(95 \%\) & \(97 \%\) \\
\hline \(\mathbf{O 3}\) (Jan-Mar) & \(74 \%\) & \(90 \%\) & \(95 \%\) \\
\hline Q4 (Apr-Jun) & \(90 \%\) & \(94 \%\) & \\
\hline \begin{tabular}{l} 
Annual \\
average
\end{tabular} & \(\mathbf{7 5 \%}\) & \(\mathbf{9 3 \%}\) & \\
\hline
\end{tabular}

Purpose: To provide a high level of customer service at our customer service center.
Definition: Administrative citation hearings are second level protests of vehicle tows, parking citations, and other infractions. The average waiting time is the time between the hearing request being recorded by a window staff and fulfillment of request by a Hearing Officer.
Method: Monthly reports generated by Hearing Division computer system.

\section*{AVERAGE WAIT TIME}
\begin{tabular}{|l|c|c|c|}
\hline & FY06 & FY07 & FY08 \\
\hline \(\mathbf{Q 1}\) (Jul-Sep) & 13 min & 10 min & 8 min \\
\hline \(\mathbf{Q 2}\) (Oct-Dec) & 10 min & 8 min & 6 min \\
\hline \(\mathbf{Q 3}\) (Jan-Mar) & 15 min & 8 min & 5 min \\
\hline \(\mathbf{Q 4}\) (Apr-Jun) & 12 min & 8 min & \\
\hline \begin{tabular}{l} 
Annual \\
average
\end{tabular} & \(\mathbf{2 0} \mathbf{~ m i n}\) & \(\mathbf{9} \mathbf{~ m i n}\) & \\
\hline
\end{tabular}

\section*{\% OF CUSTOMERS SERVED WITHIN 10 MINUTES}
\begin{tabular}{|l|c|c|c|}
\hline & FY06 & FY07 & FY08 \\
\hline Goal & \(\mathbf{8 0 \%}\) & \(\mathbf{8 0 \%}\) & \(\mathbf{8 0 \%}\) \\
\hline Q1 (Jul-Sep) & \(55 \%\) & \(62 \%\) & \(83 \%\) \\
\hline \(\mathbf{Q 2}\) (Oct-Dec) & \(43 \%\) & \(68 \%\) & \(86 \%\) \\
\hline \(\mathbf{Q 3}\) (Jan-Mar) & \(48 \%\) & \(71 \%\) & \(90 \%\) \\
\hline Q4 (Apr-Jun) & \(59 \%\) & \(71 \%\) & \\
\hline \begin{tabular}{l}

average
\end{tabular} & \(\mathbf{5 0 \%}\) & \(\mathbf{6 8 \%}\) & \\
\hline
\end{tabular}

\section*{Residential parking permit renewals: \% of applications returned to residents within 21 days}

Purpose: To improve the level of customer service by ensuring prompt response to by-mail renewal residential parking permit applications.
Definition: Percent of renewal permit applications returned to residents within 21 days of receipt.
Method: Electronic report generated by DPT contractor overseeing the program.
\begin{tabular}{|c|c|c|c|c|c|}
\hline \multicolumn{6}{|c|}{RESPONSE RATE} \\
\hline & FY04 & FY05 & FY06 & FY07 & FY08 \\
\hline Goal & N/A & 90\% & 95\% & 95\% & 95\% \\
\hline Q1 (Jul-Sep) & 98\% & 94\% & 87\% & 93\% & 94\% \\
\hline Q2 (Oct-Dec) & 98\% & 95\% & 92\% & 95\% & 94\% \\
\hline Q3 (Jan-Mar) & 86\% & 61\% & 95\% & 96\% & 97\% \\
\hline 04 (Apr-Jun) & 83\% & N/A & 93\% & 90\% & \\
\hline Annual average & 91\% & 51\% & 92\% & 94\% & \\
\hline
\end{tabular}

\section*{D Employee Satisfaction}

\section*{D1 Grievances}

Purpose: To record and monitor the status of all grievances.
Definition: Quarterly reports include the number of new grievances (filed, resolved, and active).
Method: An internal tracking system is used to provide data for the Board on a quarterly basis.

\section*{\# OF TRANSIT OPERATOR GRIEVANCES}
\begin{tabular}{|l|c|c|c|c|c|c|c|}
\hline & FY02 & FY03 & FY04 & FY05 & FY06 & FY07 & FY08 \\
\hline \(\mathbf{Q 1}\) (Jul-Sep) & 7 & 23 & 7 & 15 & 9 & 10 & 22 \\
\hline Q2 (Oct-Dec) & 14 & 13 & 24 & 13 & 12 & 30 & 17 \\
\hline Q3 (Jan-Mar) & 32 & 14 & 14 & 20 & 9 & 17 & 15 \\
