## Overview

Beginning in fall 2012, the SFMTA, which operates Muni, proposes a pilot project to test Muni and Taxi Only Lanes along three blocks of Church Street between 16th Street and Duboce Avenue. This proposal aims to reduce delays and improve service reliability for Muni's J Church trains and 22 Fillmore buses by allowing Muni vehicles to bypass traffic congestion and access transit stops more quickly. Left turns would be restricted from Church Street at 15th and 16th streets during weekday daytime hours (7 a.m.-7 p.m.) This proposal is a component of the Transit Effectiveness Project (TEP), a comprehensive effort to improve reliability and provide quicker trips for Muni customers.

A formal hearing on the proposed pilot project was held on August 31 at City Hall, and an informational meeting was held on August 27 at the CPMC Davies Campus.
